

APOLLO TOWER

TECHNICAL SPECIFICATIONS

Apollo is an exceptional residential building which combines contemporary design and high-quality construction, making it one of the most noticeable buildings in the area. Apollo while being in a quiet neighborhood, is just a small distance away from the two biggest private Universities in Nicosia, the Hilton Park Hotel, central coffee shops, restaurants and other amenities, making its location ideal. The project consists of six floors and a total of 16 apartments; 10 One-bedroom apartments, 5 Two-bedroom independent apartments, 1 Three-bedroom superior penthouse apartment. For each apartment, an inspired and artistic interior design was conceived which allows residents to create a tailored and comfortable living environment. The well-planned prime location of the tower only compliments to the building's unique features.

Anti-seismic design

The static institution of the building is drawn from steel reinforced concrete and in accordance with anti-seismic regulations.

General

The dimensions presented on the plans are at maximum approach and none of the involved parties should have any other claim from the other for any approximate difference. Any plans, promotional or prospective which are not counter-signed when signing contracts, are not part of the agreement and do not bind the seller. With this agreement, the buyer is responsible to provide all the necessary information for the smooth progress of the construction work in accordance with the timetable agreed. It should be noted that in the event of inability or subversive for progress delay in decision-making on behalf of the Buyer or a representative, the seller holds the right, upon certain notification, to proceed with the adoption of measures that will ensure the productive efficiency and timely delivery of the property. There is no provision for any compensation or any other remedy for the buyer for any consequences that may arise from such works. The seller is possible during the rebuild of the project: To alter or modify the plans, if in the sole discretion of the supervising architect, these modifications are reasonably necessary for technical or aesthetic reasons, provided that these do not affect the Building substantially and provided that they comply with the laws and regulations concerning the construction of buildings.

Note 1: The above values of technical specifications include the value-added tax of 19% as it is today. In the event of a change in the rate of Vat, the prices of materials are adjusted automatically based on the new rate.

Note 2: the amounts of provision for the woodworking will be applied by the GOLD HERITAGE company as agreed with the vendor who will execute the project.

Note 3: Amount of deduction is the amount which will be charged to the buyer, in case of selection of materials from suppliers who do not cooperate.
