

EXPERIENCE A
BALANCED LIFE

GOLD HERITAGE's brand new development named Butterfly Park Residence will adorn the area of Aglantzia.

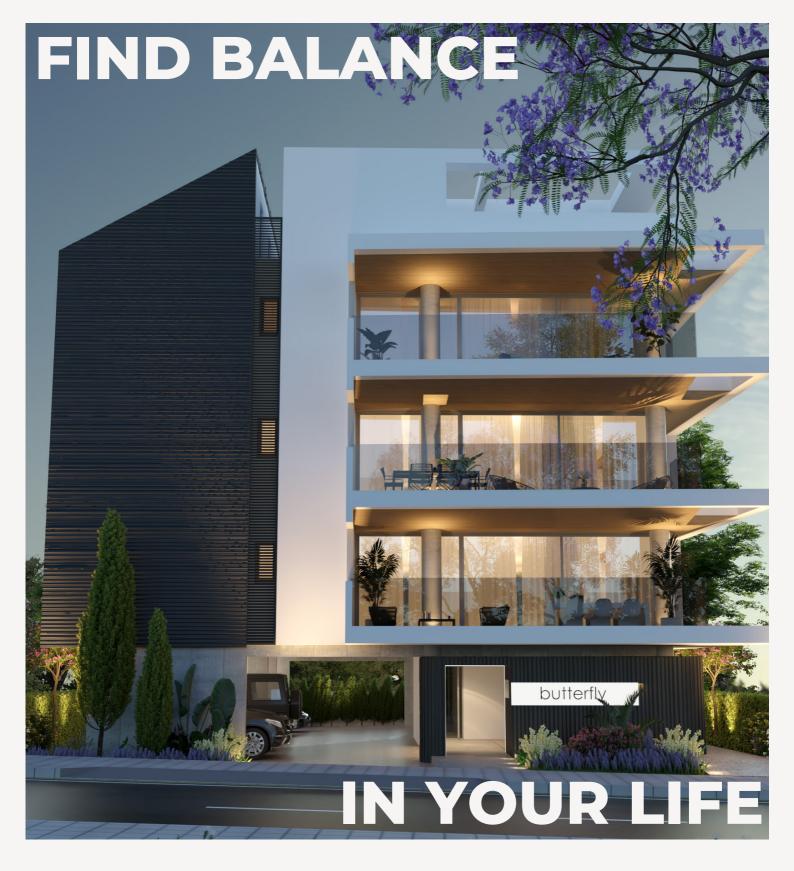

Butterfly Park Residence is characterised by its exceptional architecture and modern design, which is expected to offer a fresh, contemporary look to the cityscape of the area. Its name originates from the symmetric design of the building. The exceptional details and overall design add harmony and elegance to the entirety of the building, whilst the ivory colour and natural tones showcase the main inspiration of the project.

This impressive project which carries the GOLD HERITAGE signature, will be constructed to attract individuals that know what they want for themselves, work hard to achieve their goals, and simultaneously enjoy a life of comfort. The spacious apartments of Butterfly Park Residence make them ideal for families, as they meet all the modern needs and offer a sense of safety that each individual would search for in their dream home.

A boutique apartment complex consisting of 6 different 2 & 3 bedroom apartments.

The class A energy performance and advanced technology that is integrated in all the apartments, distinguish the Butterfly Park Residence as a unique, breathtaking building. All the apartments provide allocated private parking spaces, storage, installed air condition systems and underfloor heating with a heat pump system. The entire building, as well as each apartment separately, offer independent photovoltaic systems and infrastructure to charge electric vehicles, applying in practice the concept of "sustainability" and "green" buildings.

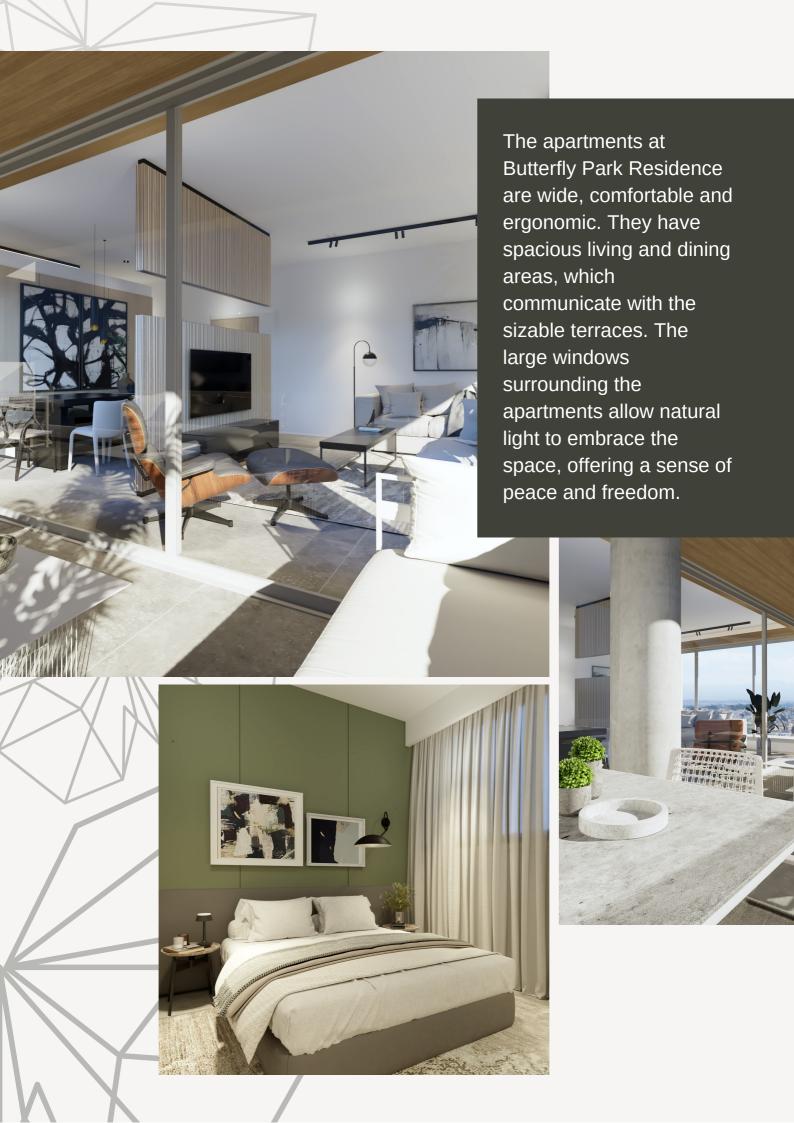

#### INTERIOR DESIGN

The style of the interior design was approached in a contemporary style and is mainly based on modern lines and minimal furniture. The canvas of light-coloured walls and earthy floors and doors was enriched with shades of grey in its warmest spectrum, using several touches of black and strong decorative elements. Most of the furniture is characterised by simple, modern lines and natural colours, with an emphasis on functionality. Textures of wood, marble, metal and fabrics of cotton and artificial leather enliven the space and enhance the overall sense of elegance of the apartments.

#### SPECIFICATIONS

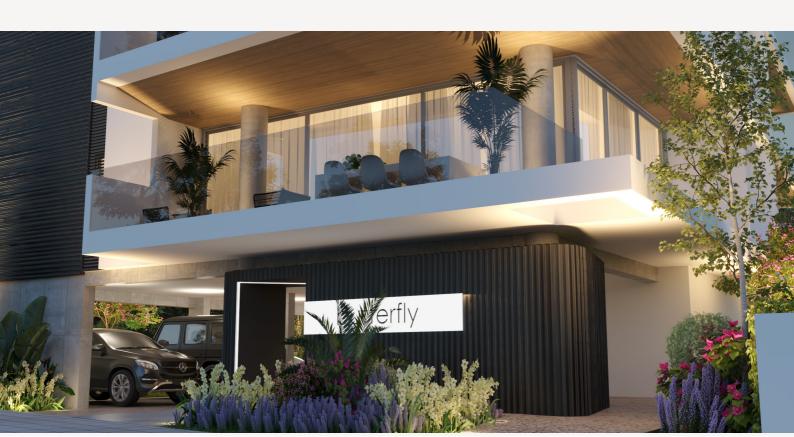

- Quiet, residential area
- Located behind Spyros Kyprianou Park, in Aglantzia
- · Class A energy building
